Conservative Friends of *NHS*

ANNUAL REPORT

Conservative Friends of the NHS was founded by Dr Ashraf Chohan in 2019. There was perception that NHS staff support Labour. Labour Party also claims that NHS was formed by them. To counter this perception it was essential to form this group. Conservative Friends of the NHS consists of doctors, paramedics, nurses, allied health professionals and other healthcare workers that aim to build long term support for the Conservative Party and enhance the support for the NHS, through our active outreach programmes to further the party's commitment to inclusivity. We address the lack of political diversity and representation by encouraging members to run for office.

St Helier Hospital

Current State of Play – Estate Challenges & Funding Update

Summary Briefing Pack

gesh NHS
Epsom and St Helier University Hospitals NHS Trust
8th April 2025

About

- In an NHS trust with Epsom since 1999, grouped with St George's in 2022.
- 900,000 patients per year, 7000 staff across St Helier & Epsom.
- Both general hospitals, with A&E and maternity services in both sites, run services from Sutton hospital (and others) and have integrated care partnerships with Surrey Downs and Sutton Heath.
- CQC Good rating (2019). Maternity services, Requires Improvement (2023).

St Helier hospital estate

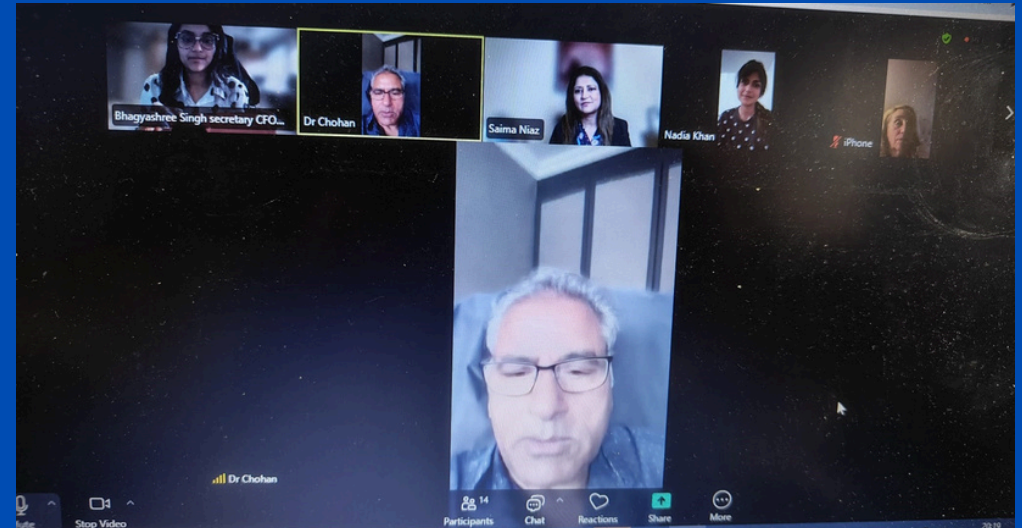

- Built during WW2. 90% of the estate is older than the NHS.
- 98% of the St Helier estate is either in very poor or bad condition, requiring capital investment or replacement.
- 80% of the estate is not functionally suitable for the delivery of modern patient care – in heatwaves the wards are stifling hot, in winter there are floods, leaking roofs, heating failures. Only 24% of inpatients are cared for in single rooms, with a third of these ensuite, windows don't close, windows boarded up, ward knocked down due to sinking foundations, 600 operations cancelled in 2024 due to ventilation, lifts break etc.
- Every year, millions invested to rectify and improve the fabric of the buildings. Approx £71m backlog of repairs & maintenance in the Trust (as at March 2024).

NHS 10-Year Forward Plan - A Strategic Meeting Hosted by CFONHS

The CFONHS team, comprising clinicians from diverse backgrounds across both primary and secondary care, came together to critically discuss the newly discussed *NHS 10-Year Forward Plan .

While the plan is ambitious in vision, the team highlighted key concerns regarding its practicality, particularly the lack of a clear implementation strategy. The discussion focused on addressing the real challenges on the ground and the disconnect between policy and delivery.

Meaningful dialogue like this is essential to shaping a healthcare system that truly meets the needs of both patients and professionals.
